This paper

Research Question

- ① What prevents households from investing?
- ② What make them invest?
- ③ How are expectations and financial investments connected?

Inserting questions in the *Bundesbank Online Pilot (BOP)* I find that...

- ① **Participation costs:** lack of information and interest
- ② **Adjustment costs:** risk and time constraint
- ③ **Buyers** invested either because of opportunity or savingsplan.
- ④ Higher house price and inflation **expectations** reduce the likelihood to invest

Gap in the Literature

- ① Equity Premium Puzzle: Comparing mechanisms
In spirit of Choi and Robertson (2020); Bender, Choi, Dyson, and Robertson (2019)
- ② Adjustment Costs and how to overcome them
Bonaparte, Cooper, and Zhu (2012)
- ③ Expectations and Financial Asset investments
Giglio, Maggiori, Stroebel, and Utkus (2019); Manski (2018)

Bundesbank Online Panel

- Bundesbank Online Pilot Survey on Consumer Expectations (BOP)
- Online survey of German citizens aged 16 years or older
- Monthly survey with 2,000 households
- Representative sample
- Individuals' expectations and socio-demographic characteristics

Bundesbank Online Panel

- Bundesbank Online Pilot Survey on Consumer Expectations (BOP)
- Online survey of German citizens aged 16 years or older
- Monthly survey with 2,000 households
- Representative sample
- Individuals' expectations and socio-demographic characteristics
- **Additional questions on financial asset investments**

Controls

No Participation

Takeaway #1: No Participation

- 1 Lack of information and interest are dominant factors
- 2 Importance of risk increases with age, lack of resources decrease in age, and lack of savings decreases with income

No Adjustment

No Adjustment

	Fully agree (I)	At least rather agree (II)	Mean (III)	Standardized (III)
too risky	20.47%	55.52%	2.53	0.31

Expectations and Buyer

Takeaway #4: Expectations

- ➊ Higher houseprice expectations crowds out financial asset investments
- ➋ Higher inflation expectations reduces probability to buy

Conclusion

This paper asks households about their financial investment behavior during the covid-19 pandemic and finds:

- ① **Participation costs:** lack of information and interest
- ② **Adjustment costs:** risk and time constraint
- ③ **Buyers** invested either because of opportunity or savingsplan.
- ④ Higher house price and inflation **expectations** reduce the likelihood to invest

THANKS for your attention

I am grateful for comments and suggestions

In some cases, the fund finances only individual projects, such as real estate, ship building or films. Examples of common types of funds are share-based funds, bond-based funds, money market funds, funds of funds, hedge funds, exchange-traded funds (ETFs), shipping funds and media funds.</p> <p>B) Fixed income securities are assets which entitle the bearer to a pre-determined rate of interest. Depending on who issued these securities, they could be government bonds (such as Federal bonds, Federal savings notes, Federal Treasury financing paper, Federal Treasury notes, municipal bonds, Pfandbriefe issued by central, state or local government), corporate bonds or other debt securities (e.g. bank bonds).</p> <p>C) A listed share is a security that is traded on the stock exchange which shows the shareholder (owner of the security) as being a co-owner of a public limited company. This type of security therefore usually entitles the bearer to a share of the company's income. The share constitutes a certificate which securitises a share in the capital of a public limited company.</p>			
<p>QUESTION: What is your rough estimate of the market value of your financial assets prior to the coronavirus pandemic?</p> <p>a Fund shares [only show item if portfolio_a =1]</p> <p>b Fixed income securities (such as government bonds, corporate bonds and bank bonds) [only show item if portfolio_b =1]</p> <p>c Listed shares [only show item if portfolio_c =1]</p> <p>d Other financial products (such as foreign exchange, gold, cryptocurrency) [only show item if portfolio_d =1]</p>
